

eO+®

An innovative and economical panel system

a systems
solution

FOR TODAY'S BUSINESS

An economical furniture system, designed with the small office in mind.

Designed to meet the needs of today's small office environment, eO+ is aesthetically appealing, easy to specify, install and reconfigure, all at a surprisingly low cost.

eO+ panels are lightweight but strong enough to support overhead storage components and panel mounted worksurfaces. A universal 2/3/4-way corner post together with a unique "Knuckle-loc" design provide solid panel-to-panel connection for fast assembly and easy reconfiguring.

To address today's environmental sustainability concerns, eO+ panel frames are made from recycled aluminum and are painted with a durable epoxy powder coating that is VOC and lead free. The core of the eO+ panel is a tackable honeycomb made from 30% recycled card stock. Nothing from an eO+ panel needs to go to landfill! The entire eO+ panel is recyclable at the end of its life.

Worksurface cores are made from 100% recycled woodchips. The metal components consist of 30% recycled steel. These components combine with the eO+ "sustainable" panels to help conscientious buyers minimize their environmental footprint.

Cover, above, back: Shown in Tiger Maple (TMP) with Tungsten 2 legs (TU2). Fabric panels in Lola Zucchini (LL15) and Brinx, Green Apple (BX03). Supra seating shown in Crescent Pear (701).

A versatile product with many small office applications.

Collaborative Workstation shown with transaction top

Reception Workstation shown with transaction top

66" panel configurations allow the user to build private or semi-private offices for executive, management and reception areas that maintain privacy.

Double Clerical Workstation shown with overhead storage

Telemarketing Workstation with a pedestal supported worksurface

Panels and ergonomically designed worksurfaces are configured to provide ample space and privacy for individual tasks in an open office while facilitating occasional group interaction.

Management Workstation with frosted panel for privacy

Customer Service Workstations shown with bookshelf

Travel Agent Workstations

Designed to meet the needs of small office environments, eO+ has many practical features.

Extruded aluminum panel frames support optional glazing.

All worksurfaces are panel supported and designed with ergonomics in mind.

Panel hung storage components are simple but practical solutions.

Work surface supporting pedestals reduce the cost of the workstation.

Tackable panel interiors buffer office sounds and are recyclable.

Panel mounted red beltline power bar includes 4 receptacles, 2 data jack adapters.

Adapt power/data module attaches to scoop at the back of a work surface.

Mini-adapt power module brings power and data to the work surface.

Cable Scoops. Power and communication cables are routed through cable scoops at the back of work surfaces.
